Scraper/Wiper
These 2-way matting systems are the ultimate in defense against dirt and moisture inside your building, protecting people from slips and floors from damage. Maintenance costs will also be kept to a minimum.

Wiper Matting
This is the last line of defense inside a building. This matting wipes residual water from your shoes, and traps and holds fine sand.

The Truth About Dirt
It can cost more than \$500 to remove 1 pound of dirt after it has been tracked into a building. Up to 24 pounds of dirt can be tracked into a building by just 1000 people coming through an entrance every day over a 20 day work period. Without adequate matting, 42% of a floor's finish can be removed within the first 6 feet of an entrance after only 1500 people have walked in.
