

DE-ICER

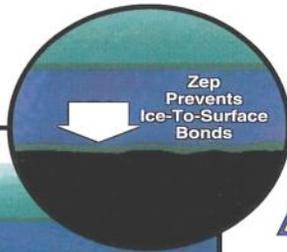

Why Zep De-Icer?

Zep De-Icer is a Premium Ice Melter.

It is a unique formulation that provides a safe surface for the public without any adverse effects on the environment if used as directed.

Zep De-Icer will chemically not harm concrete when used as directed. Zep De-Icer lowers the working temperature range allowing it to work up to 3 times faster than ordinary ice melters.

How Does Zep De-Icer Work?

Ice Layer

Zep De-Icer Brine Solution

Concrete

When pre-applied, Zep De-Icer provides a residual coating effect that prevents the formation of ice-to-surface bonds! Zep De-Icer will not chemically attack concrete. Freeze-thaw damage can occur when water or brine produced by the use of ice melters seeps into surface pores of concrete and expands as it refreezes. The greater the expansion rate the greater the pressure build-up inside the pores.

ZEP MANUFACTURING COMPANY OF CANADA

*Not for use on concrete that is less than one year old.

Zep Sidewalk De-Icer

- Fast acting to -32°C. (-27°F.)
- Uniform coating of 2 de-icers
- Long lasting Brine Solution
- Designed to be gentle on landscape
- Chemically will not harm concrete
- Low end use cost
- Free flowing non-caking
- Non WHMIS regulated
- No dusting, no tracking
- Product won't blow away
- Green in color for ease of application
- Contains no Calcium Chloride
- Granules uniformly sized
